02 / OPERATING PROFILE

Target Company Profile

Field	Value
Company Name	ChatGPT
Business Description	Not provided
Sector	AI / Machine Learning
Sub-Sector / Industry	Foundation Models / LLMs
Geography	North America
Revenue Model	Subscription / SaaS
Customer Type	Mid-Market

Field	Value
Revenue	\$500M
Revenue Growth	81.0%
Gross Margin	52.0%
EBITDA Margin	40.0%
Employee Count	1197

03 / WHY THIS COMP

Comparable Selection Rationale

- Palantir Technologies Inc. (PLTR) has the highest or strongest available match score at 87.7%.
- Revenue scale is comparable: target revenue of \$500M versus Palantir Technologies Inc. revenue of \$2,900M.
- Business exposure is directionally similar based on sector / industry labels: target = AI / Machine Learning, selected comp = AI / Machine Learning.
- Palantir Technologies Inc. has relevant software, cloud, collaboration, storage, or subscription exposure based on available description fields.
- Palantir Technologies Inc. provides a usable public-market EV/Revenue multiple of 63.1x, which can be applied to the target revenue base.

5.0x	\$500M	\$2.50B

Charts and Data Quality Review

10 / REVIEW NOTES

Red Flag / Data Quality Section

Issue

Palantir Technologies Inc. (PLTR) shows EBITDA margin of 79.3%, which appears unusually high and should be source-checked. It may be gross margin or an adjusted metric.

Palantir Technologies Inc. (PLTR) shows EV/EBITDA of 305.0x, which appears to be an outlier and may distort peer statistics.

MongoDB (MDB) shows EV/EBITDA of 105.0x, which appears to be an outlier and may distort peer statistics.

Datadog (DDOG) shows EV/EBITDA of 84.0x, which appears to be an outlier and may distort peer statistics.

Marvell (MRVL) shows EV/EBITDA of 100.7x, which appears to be an outlier and may distort peer statistics.

Advanced Micro Devices (AMD) shows EV/EBITDA of 116.8x, which appears to be an outlier and may distort peer statistics.

Metric Definitions

- $EV/Revenue$ = Enterprise Value divided by revenue.
- $EV/EBITDA$ = Enterprise Value divided by EBITDA. This is hidden from valuation output when target EBITDA is missing.
- Gross Margin = Gross profit divided by revenue.
- EBITDA Margin = EBITDA divided by revenue.
- Rule of 40 = Revenue growth plus free cash flow margin, where both data points are available.
- All financial metrics should be checked against source filings, market data providers, or company disclosures before using the report externally.
